### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The present application relates to arrangement for three dimensional imaging. The various cited prior arts of record fail to anticipate or render obviousness a viewing system comprising an arrangement for producing, via microstereopsis as defined by the specification page 4, at least one image that is perceived as three dimensional, wherein camera or virtual camera interocular separation, without being scaled for human interocular separation, is substantially less than about 60mm as specified in claims 1, 17 and 23; and method of producing at least one image of a scene for being perceived autostereoscopically as three-dimensional, said method comprising the step of compensating the center-of-interest of the at least one image to cause the residual on-screen disparity in a foreground image and in a background image of the scene to be perceived, in the presence of crosstalk between left-eye and right-eye component images of the at least one image, as blurred and not ghosted as specified in claim 6; and a method of producing at least one image for being perceived as three dimensional, said method comprising the steps of: providing a viewing system that includes a stereo display; and configuring the viewing system such that crosstalk produced by the stereo display is perceived as foreground and background blur instead of ghosting as specified in claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
